

Tech-Restart Learning Companion

A multi-agent AI system that helps you pick up exactly where your brain left off.

Assess knowledge gaps → Generate a personalised roadmap → Surface curated resources — all in under 2 seconds, running 100% locally.

⚠ GAPS TO ADDRESS

Model Validation

Overfitting

Feature Engineering

Gradient Descent

Ensemble Methods

Phase 1

Foundation Reset

Core syntax & concepts

- Focus first on: Model Validation
- Re-read bias-variance tradeoff notes
- Rebuild a linear regression from scratch

6h

Phase 2

Applied Practice

Worked examples & exercises

- Train a Random Forest on Titanic dataset
- Tune hyperparameters with GridSearchCV

6h

Phase 3

Mini Project

Build something small end-to-end

- Submit to a beginner Kaggle competition

3h

MCP RESOURCE SCOUT

Curated Learning Resources

Hand-picked by ResourceScout via the local MCP server • Matched to your gaps.

Machine Learning

2 resources matched

Intro to Machine Learning (Kaggle) [interactive](#)
Perfect first ML course â€” visual, intuitive, and hands-on.
🕒 ~3h [kaggle.com](#)

Andrew Ng â€™ ML Specialization [video+assignments](#)
The gold-standard ML course. Great for theoretical grounding.
🕒 ~33h [coursera.org](#)

Deep Learning

2 resources matched

fast.ai Practical Deep Learning [video+notebooks](#)
Top-down, practical deep learning â€” best way to learn by doing.

Deep Learning

2 resources matched

fast.ai Practical Deep Learning video+notebooks

Top-down, practical deep learning â€” best way to learn by doing.

🕒 ~20h [fast.ai](#)

Deep Learning Specialization (Coursera) video+assignments

Andrew Ng's 5-course deep learning deep dive.

🕒 ~80h [coursera.org](#)
