Portfolio

Technical Skills

Languages

Python, HTML, JavaScript, C++

ML & Data

Scikit-learn, Pandas, NumPy, TensorFlow, Matplotlib, Seaborn

NLP

spaCy, NLTK, NLP Pipelines, Prompt Engineering

Deployment

Flask, Streamlit, Docker, Streamlit Cloud, Render

Tools

Git, GitHub, SQL, VS Code, Web Scraping

Professional & Soft Skills

Structured Problem-Solving (McKinsey Approach), Business Communication, Adaptability & Resilience, Digital Toolkit Fundamentals

Certifications

Forward

McKinsey.org — Jun 2026
Skills: Structured Problem-Solving, Business Communication, Adaptability & Resilience, Digital Toolkit Fundamentals

What Is Generative AI?

LinkedIn Learning — May 2026
Skills: Generative AI Tools, Artificial Intelligence (AI), Generative AI

Cyber Security Fundamentals

Deloitte

AI Tools Workshop

Be10x

Gen AI Powered by Data Analytics

TATA

Education

Bachelor of Computer Applications (BCA)

Mohta PG College, Sadulpur, Rajasthan
Jul 2023 – Aug 2026 | CGPA: 8.25
Specialization: HTML, Python, OOP, AI/ML Engineering, Data Science

Achievements & Activities

- E-Cell, Mohta PG College** — Core Team Member (2025–2026): Managed the seamless organization of 5+ events for E-Cell, promoting entrepreneurship and startup culture among students. Delegated an Entrepreneurship Awareness drive for 300+ students.
- Training and Placement Cell, Mohta PG College** — Committee Member (2025–2026): Collected and managed contacts of 200+ potential companies for placement purposes. Assisted in the daily coordination of placement drives, supporting over 300 students in securing job opportunities.
- Event Organiser — Fresher's Party** (2024–2025): Coordinated full event logistics, scheduling, and cross-team collaboration for college Fresher's Party. Demonstrated leadership by liaising with faculty and student teams across departments.

Professional Summary

AI/ML-focused BCA student and Google Student Ambassador with hands-on experience building end-to-end machine learning systems (NLP, predictive modeling, deployment with Flask/Streamlit). As a Google Student Ambassador, actively promote Google technologies, organize tech events, and empower fellow students with cutting-edge tools and resources on campus. Delivered deployed projects achieving **87%+** model accuracy and automating **500+** resume screenings. Seeking entry-level Data Scientist or ML Engineer roles.

Experience

Google Student Ambassador

May 2026 – Present

Mohta PG College, Sadulpur, Rajasthan

- Promoted Google technologies and tools among students, bridging the gap between academic learning and industry-relevant skills.
- Organized workshops and tech sessions on Google Cloud, AI tools, and developer programs to foster a culture of innovation on campus.

Data Science Intern

May 2026 – Jun 2026

Cognifyz IT Solutions Pvt. Ltd. — Nagpur, Maharashtra, India — Ref: CTI/A1/C353394

- Selected for Data Science Internship at Cognifyz IT Solutions Pvt. Ltd., working on analyzing complex datasets and deriving meaningful insights.
- Responsible for collecting, cleaning, and interpreting data, as well as assisting in the development of data-driven solutions.
- Applying analytical mindset and attention to detail to contribute to data-driven decision-making across various projects and tasks.

Projects

Customer Churn Prediction System

GitHub Live Demo

Python — Scikit-learn — Flask — Streamlit

- Achieved **87%+** accuracy on churn prediction using Random Forest with cross-validated evaluation.
- Built end-to-end ML pipeline with EDA, feature engineering, and model optimization; reduced false positives by **~15%** through iterative feature selection.
- Developed interactive analytics dashboard with Streamlit for real-time churn visualization and insights.
- Deployed trained model as a REST API via Flask and live on Streamlit Cloud, enabling integration with external business systems.

AI-Powered Resume Screener

GitHub Live Demo

Python — NLP — Scikit-learn — Streamlit / Flask

- Reduced manual resume screening effort by **~70%** by automating candidate ranking using an NLP + ML pipeline.
- Built NLP pipeline using spaCy/NLTK to extract skills, qualifications, and keywords from **500+** PDF resumes automatically.
- Implemented ML-based candidate ranking with Scikit-learn to match resumes against job descriptions; integrated TensorFlow for deep semantic matching.
- Deployed on Render with Streamlit/Flask frontend handling real-time PDF upload, automated scoring, and reasoning display.

OOP Chat System

GitHub

Python — Socket Programming — OOP

- Designed scalable architecture using core OOP principles: Inheritance, Encapsulation, and Polymorphism.
- Engineered advanced features including private messaging, group chat, and secure user authentication.
- Implemented exception handling for stable performance during network disconnections.
